

FEATURED JOB

Plant Room Propping

"We were asked to provide propping support for the form work of a concrete lid on this plant room," said Greg Lennon of Action Scaffolds. The slab thickness was 500mm (12.5kN/m² or 1.25 tonnes/m²). "Within the confines of a 4m diameter, Allround's variety of bay sizes and load capacity enabled us to give the crew at Tweed Shire Council a superior coverage of the formed area and a work platform for their team to safely and easily install their formwork. As always the technical support of Julian Schrauth was excellent."

Thanks to Greg Lennon of Action Scaffolds for the use of these photos.
